

# Container Dri II

## Container Dri® II

Eliminates product damage due to moisture by removing humidity and lowering the dew point temperature. Container Dri® II significantly reduces losses due to container rain and ambient moisture. Container Dri® II saves money, time and resources.

## Container Dri® II Packets

Container Dri® II absorbs moisture vapor and reduces dew point temperature inside transport containers. By preventing condensation, Container Dri® II eliminates corrosion, mildew, peeling labels, and other harmful effects of moisture-related damage during shipping and storage.

## Container Dri® II Strip™

Container Dri® II is also available in a continuous strip. Configured in a continuous strip of six 125 gram bags of Container Dri® II, this new product reduces time and labor during cargo loading, improving efficiency and lowering overall shipping costs. Each Container Dri® II Strip™ features a waterproof adhesive peel-off back for easy placement along shipping container walls.
